Noise report

Department: RH test day

Report time period: 00:00-23:59 - 13. oktober 2016

Description: This report gives you an overview of noise levels for each device during your chosen period of time. Pay close attention to the red areas in the graphs, which indicate that the noise level has been too high.

Average noise levels

![Average noise level graph]

Most noisy locations

![Most noisy locations graphs]

Lowest noise level: Device Office 3 at 08:42, 16,9 dB

Highest noise level: Device Office 1 at 11:12, 75,4 dB

Critical noise levels: 4 times at device Office 1

‘Critical noise level’ indicates that noise levels have reached your noise limit, and an alarm message has been sent.
